

Corptax GTI

**Every obligation, every entity, every jurisdiction,
in one connected view.**

Global tax & regulatory intelligence in a centralized system

Most tax teams don't have a dedicated system for managing global tax and regulatory obligations. Instead, they rely on a combination of spreadsheets, shared drives, calendars, and collaboration tools to track filing deadlines, registrations, notices, and reporting requirements across entities and jurisdictions.

This approach can work at smaller scales, but it breaks down quickly as organizations expand and regulatory complexity increases.

CSC Corptax® Global Tax and Regulatory Intelligence (Corptax GTI) is a purpose-built solution that replaces fragmented tracking methods. Corptax GTI centralizes tax and regulatory obligations, automates due-date tracking, and gives leadership real-time visibility across entities and jurisdictions so teams spend less time chasing deadlines and more time managing risk.

Why Corptax GTI Matters

Global tax teams are responsible for far more than tracking deadlines. They must ensure obligations are clearly assigned, filings are completed on time, documentation is maintained, and emerging risks are identified early.

Without consistent visibility and oversight, teams spend too much time chasing updates, validating information, and responding to requests with incomplete or inconsistent information.

Tax teams face:

- Limited visibility across jurisdictions and entities
- Manual tracking across disconnected tools
- Rising audit and regulatory scrutiny
- Disconnected legal and tax processes
- Increased operational risk tied to spreadsheets and key-person dependency

The result is reduced confidence in reporting accuracy, increased administrative burden, and limited ability to proactively manage obligations.

What Corptax GTI Delivers

Corptax GTI provides a structured, centralized view of global tax and regulatory obligations, enabling teams to move from reactive tracking to proactive management.

Increased Real-Time Visibility Across Obligations | Centralized dashboards and calendar views provide insight into due dates, ownership, status, jurisdictions, and entities in one place.

Reduced Manual Tracking and Greater Control | Generate obligations automatically based on the entity profile, drawing from your existing entity management or a proprietary database of public filings, to reduce manual entry and lower the risk of missed filings.

Faster Notice Intake and Response | Capture notices, audit correspondence, or regulatory communications as Corptax GTI identifies the jurisdiction, obligation type, and response deadline automatically.

Audit-Ready Documentation | Attach returns, workpapers, notices, and supporting documentation directly to each obligation with a version-controlled history.

Improved Cash Tax Forecasting | Gain insight into upcoming cash tax obligations across jurisdictions to support forecasting, payment planning, and coordination with treasury teams.

What Tax Leaders Gain with Corptax GTI

VISIBILITY

Understand what is due, who owns it, and where it stands at any point in time with **real-time status tracking and executive reporting.**

RISK OVERSIGHT

Standardize processes, maintain clear ownership, and create a complete record of activity across obligations, jurisdictions, and entities.

OPERATIONAL MOMENTUM

Minimize missed obligations, manual errors, and key-person dependency through standardized workflows and automated processes.

See What GTI Looks Like for Your Organization

Backed by nearly 50 years of purpose-built tax technology, CSC Corptax helps organizations manage complex tax operations with greater visibility, control, and confidence.
