

Do you have big ambitions to change how business gets done?
We do too.

Companies choose CSC[®] as their business partner because we offer expert business and legal solutions that create a competitive edge, helping them perform at their best. **We are the business behind business[®].**

CSC is an industry leader and a trusted partner to many of the world's most successful organizations. At CSC, you'll work with highly capable people, and you'll have the freedom and support to turn your ideas into action. We work with the latest technology products and provide training and coaching to employees to utilize technology to innovate. We hire **collaborative technology** experts with an **entrepreneurial mindset** and challenge them to build solutions that influence the way business gets done.

People choose CSC because we are **encouraged and empowered** to take initiative to solve problems, build relationships, and make a difference for the people we serve. If you like partnering with in-house experts, learning through teamwork, and want to be part of a growing, global business, review the information below to consider where you might fit in.

TYPICAL POSITIONS INCLUDE:

- Software engineering
- Architecture
- Infrastructure services
- IT security
- Technology project management

Software Engineering

Software Engineering at CSC is core to how we serve our customers and is one of our differentiators in the marketplace. Our innovative, reliable, and award-winning solutions are built on a culture that emphasizes teamwork, agility, and the ability to think beyond the obvious by leveraging the experience and tenacity of our people. At CSC, successful team members in Software Engineering will be:

Software engineers who innovate and challenge themselves to deliver quality solutions in highly automated ways to our customers. **Software test engineers** that work closely with our software engineers on the development and automated verification of our solutions. And **business analysts** who collaborate with stakeholders and our Software Engineering Team to analyze, document, and ensure the successful release of software requirements, which should always align with company goals.

In our corporate tax division, **CSC Corptax**, successful Software Engineering team members should have a strong working knowledge of the latest Microsoft tools and technologies used to develop .NET web applications. You'll play an active role in the design and development of features for our cloud-based commercial tax software. You'll also help identify and leverage exciting new technologies, define best practices, and guide the optimization of a large and growing technology portfolio. Any company can build an application, but we're striving to deliver an innovative end-to-end tax platform that enables business agility.

 **10+**
Years of Development

We have been developing agile methodology for **more than 10 years**.

Architecture

CSC's Architecture Team helps power CSC's growth by charting the company's technology path to the future. This team connects CSC's business strategy to IT developments, partners with teams to identify and leverage exciting new technologies, defines best practices, and guides the optimization of an extensive and growing technology portfolio. Any company can build an application, but we are striving to deliver an innovative knowledge-based platform that enables business agility.

As an architect, you will find yourself working with teams to conceptualize and realize solutions that increase operational excellence and efficiency, provide a competitive advantage, and enable new revenue streams.

We hire **architects** in our business units and Shared Services Teams as well as at the enterprise level. Successful team members will ensure consistent business and IT alignment, become trusted advisors and valued team members. Strong collaboration skills are a must. CSC business and technology portfolios are always expanding, so a constant focus on learning is also an ingredient for success.

Infrastructure Services

At CSC, a customer is anyone who asks something of us. The Infrastructure Services Team makes a difference by focusing on the internal and external customer. This team embodies the "customer-first" mindset.

We hire a variety of highly skilled **infrastructure engineers** to develop, run, and maintain the systems and networks that let information flow freely between all of CSC's global systems—anytime, anywhere. CSC's worldwide reach and distributed network create unique challenges for highly qualified, innovative, and experienced people to tackle. The team is fun, smart, ambitious, and genuine—a tight-knit group that values communication. If you're able to create solutions from scratch and want to join a team of IT pioneers, you'll love working on this team.

IT Security

IT Security partners closely with our IT and Infrastructure Teams to secure CSC's corporate systems and network, enterprise applications and data, and to enable new business functions. CSC is a community and culture built on trust, and this team is a critical part of that foundation.

The IT Security Team focuses on proactive security, hiring hands-on **security engineers** who are passionate about building and defending internal and external customer data.

As a security engineer at CSC, you help protect network boundaries, keep computer systems and network devices hardened against attacks, and provide security services to protect highly sensitive data, like passwords and customer information. Security engineers work with network equipment and actively monitor our systems for attacks and intrusions. You also work with software engineers to proactively identify and fix potential security vulnerabilities.

Technology Project Management

CSC's Technology Project Management Teams comprise intelligent and energetic self-starters who are responsible for evaluating, planning, and executing multiple simultaneous department- or enterprise-wide projects and programs. They excel in a highly autonomous environment and have a passion for driving value through project delivery.

We hire **project managers** at CSC to be accountable for successfully meeting the timelines, budgets, scope, and quality of projects, as well as communication, adoption, and acceptance of the enterprise change introduced by each project.

Working as a project manager at CSC is an extremely fulfilling endeavor, as CSC is using leading-edge technologies, and has the smartest and best technical resources. Do you want a challenge that provides you with the satisfaction of a job well done? Then come work with us at [CSC](#).
